ABOUT ME

For the better past of the last 3 years I have been both studying at the Polish-Japanese Academy of Information Technology and gaining experience at Movuto Ltd. in the field of website administration, working with various clients. These taught me to perform excellent under pressure and manage all sorts of daily office tasks. I approach my work with meticulousness yet eagerness. In my free time I have been learning Swift programming, which I am passionate about, and so was brought to a point of seeking a job coherent with that and the education I have gained at PJATK. I know several programming languages, of which Swift is my main one.

CORE SKILLS

Primary technologies: Swift, UIKit, Git
Secondary technologies: React, PHP, MySQL
Additional skills:
- Teamwork, communicativeness, work time management, lifelong learner
- Knowledge of unit tests and design patterns
